Professional Summary

Senior Frontend Developer with 4+ years of experience building large-scale enterprise and government digital platforms using React, Next.js, TypeScript, and React Native. Proven track record delivering scalable, user-centered applications serving millions of users across utility management, regulatory systems, and e-government services. Strong expertise in frontend architecture, design systems, performance optimization, and modern UI development.

Work Experience

03/2025 – Present

Senior Frontend Developer

Awura Computing PLC

Owlevents – All-in-One Event Management Platform

- Built a drag-and-drop Name Badge and Car Pass Template Editor for customizable event credential generation.
- Developed an Email Marketing Template Builder enabling users to create and manage professional email campaigns.
- Improved overall repository performance through code optimization, component refactoring, and frontend architecture enhancements.

03/2023 – May 2026

Experienced Frontend Developer

TopLink Technologies

WUMIS – Water Utility Management System (20+ cities) View [🔗](#)

- Developed mobile-first React modules for HR, Finance, Billing, and Customer Service used across 20+ Ethiopian cities.
- Designed reusable RTK Query infrastructure that reduced API integration effort across multiple modules.
- Designed reusable components with MUI & Tailwind CSS.
- Translated Figma designs to pixel-perfect, responsive UIs.

05/2023 – 07/2025

Experienced Frontend Developer (Part-time)

Tria PLC

IFHCRS – Addis Ababa Food & Health Regulatory System View [🔗](#)

- Operational across all sub-cities, issuing licenses to health professionals and food/health facilities.
- Developed a reusable Ethiopian calendar date picker, dynamic Form.io form builder, and workflow designer using React Flow, enabling configurable business processes without code changes.
- Set up Nx monorepo with React & Next.js, creating modular, maintainable components for scalable architecture.

01/2022 – 03/2023

Frontend Developer (eService)

Perago Systems

- Built eServices and back-office apps for Ethiopia's government digital services.
- Delivered responsive UIs with React & Next.js integrated smoothly with backend APIs.

Education

2018 – 2022
